Chiropractors Improve Productivity and Profitability

Billing Precision To Present Improved Solution on February 3-4 in Orlando, FL

Dumont, New Jersey (PRWEB) January 23, 2006

– Dr. Greg Loman, Director Of Trinity Chiropractic in Naples, Florida, founder of Teach The World About Chiropractic, and author of “One Minute Wellness,” has seen improved collections because of highly skillful claims processing by Billing Precision. “In two months we caught up with my backlog and my 120-day Accounts Receivable shrank to 4.4%. This translates to almost 20% in added revenue,” says Dr. Loman, who built his practice to 150,000 patient visits a year.

A complete billing solution will be presented at a seminar “Teach the World About Chiropractic,” scheduled for February 3-4 in the Caribe Royale Resort & Convention Center in Orlando. The seminar will include extensive training on chiropractic practice development and live system demonstration.

“The doctor’s money must never be idle,” says Stephanie Capra, President of Billing Precision. “Our clients experience the lowest Accounts Receivable (A/R) beyond 120 days (below 5%), which represents a four-fold improvement over the national median (17.7%), as reported by Medical Group Management Association.”
