

## **Hamrick's VueScan 8.1.5 now supports entire range of Canon scanners**

*No other vendor supports all of Canon's professional and consumer scanner products.*

Phoenix, AZ ([PRWeb](#)) November 1, 2004 -- Hamrick Software, a leading developer of scanning software for consumers and professionals, has released VueScan 8.1.5, its award-winning program that enables users to more easily produce better looking digital images from color snapshots, negatives, slides, and documents.

No other vendor supports all of Canon's professional and consumer scanner products. VueScan 8.1.5 now supports the following Canon scanners on Windows and Mac OS X:

"Canon scanners are among the worlds' most widely sold scanners," noted Ed Hamrick, president of Hamrick Software. "VueScan's well-known capabilities in producing high-quality scans will complement the high-quality scanner hardware from Canon to produce outstanding results."

Used extensively by professional photographers, film processing labs and consumers around the world, VueScan 8.1.5 now offers an enhanced, user-friendly interface support for raw files for 109 digital cameras, and support for more than 350 scanners.

The Standard Edition of VueScan costs \$59.95 USD and the Professional Edition costs \$79.95 for a single user license. Multi-user licenses are available. A fully functional, trial copy of VueScan can be downloaded from <http://www.hamrick.com/>.

VueScan is available for Mac OS X, Windows and Linux. It automatically adjusts images to optimum color balance, which reduces the need to manually do this in Photoshop. VueScan includes built-in color calibration of scanners, producing colors that look true to life. Supporting more than 100 brands of negative film, VueScan offers options for scanning faded slides and prints; batch scanning, IT8 color calibration and other advanced scanning features.

For a detailed listing of VueScan features see:

Based in Phoenix, AZ, Hamrick Software was founded in 1991. Its first product was VuePrint, an easy to use JPEG viewer for Windows that for many years was the recommended image viewer for AOL, with more than 100,000 users. In 1998, the company first released VueScan, a program for scanning with flatbed and film scanners with more than 50,000 users all over the world.
